PROFILE

I'm **Muhammad Al Tahir**, a **Flutter Developer and Software Engineer** with hands-on experience in building cross-platform mobile applications for Android and iOS. I specialize in creating scalable, user-focused, and high-performance apps using modern tools and clean architecture. My goal is to continue growing as a developer, contribute to impactful products, and explore innovative technologies like real-time communication and AI-driven mobile solutions.

PROFESSIONAL EXPERIENCE

Flutter Developer   05/2024 – Present
Devsouq Technologies   Lahore, Pakistan

I am currently working at **Devsouq Technologies** as a **Flutter Developer**, where I have contributed to multiple projects, including the company's own flagship product as well as various client-based applications.During my time here, I have significantly enhanced my skills by working on a wide range of projects and ideas across different domains such as **AI-powered solutions, e-commerce, medical applications, ride-hailing platforms, games,** and **social media apps**.My experience includes implementing advanced **real-time communication features** using **ZEGOCLOUD** and **Agora SDKs** — such as **live streaming, video calling, audio calling,** and **real-time chat** leveraging **WebSockets** for seamless interaction and synchronization.I have utilized various **state management approaches** (including GetX, Provider, Riverpod, and Bloc) to meet specific project and client requirements effectively. Most of my work has been **API-driven**, integrating and managing data from diverse sources.I also have hands-on experience with multiple **databases** such as **Firebase, SQL, Supabase,** and **Shared Preferences**. Additionally, I have managed **Play Store** and **App Store** configurations and handled **app deployments** for production environments.Furthermore, I actively work with **version control systems** like **Git** and **GitHub**, ensuring proper collaboration, branching strategies, and code management. I have also been involved in setting up and maintaining **CI/CD pipelines** to automate testing and deployment processes, improving development efficiency and reliability.

Flutter Developer   04/2025 – 10/2025
Tech Consultivo   Remote

Through Devsouq Technologies, I have been **outsourced to Tech Consultivo**, where I have worked extensively on a **feature-rich dating application**. My responsibilities included integrating and maintaining **real-time video and audio calling,** implementing **battle games** similar to **TikTok Live**, and ensuring a **safe and compliant user experience** by incorporating **nudity and content detection mechanisms**.This role allowed me to deepen my expertise in **real-time engagement technologies, content moderation,** and **scalable architecture design**, while maintaining strong communication and collaboration with cross-functional teams across different time zones.

Flutter Developer   09/2023 – 06/2024
Solution Soul   Lahore, Pakistan

I worked at **Solution Soul** as a **Flutter Developer**, where I contributed to various projects, primarily **client-based applications** along with a few **in-house products**.During my time at Solution Soul, I focused on enhancing my **technical and problem-solving skills** by working on diverse ideas and projects across different domains. I gained experience in **building scalable mobile applications,** implementing **responsive UI/UX**, and integrating **RESTful APIs** to meet client requirements efficiently.Throughout my work, I actively used **Git and GitHub** for **version control**, ensuring proper collaboration, code management, and clean workflow practices through branching and pull requests.This experience allowed me to strengthen my understanding of **modern Flutter architecture**, improve app performance, and deliver high-quality, production-ready mobile solutions.

Flutter Developer   07/2022 – 05/2023
IT Wings Technologies   Islamabad, Pakistan

I worked **remotely** at **IT Wings Technologies** as a **Flutter Developer**, where I
contributed to several mobile applications for different clients. My work primarily
focused on **Firebase integration**, **Google Ads implementation**, and improving
overall **app performance and user experience**. Working in a remote environment
helped me strengthen my communication, time management, and independent
problem-solving skills.

SKILLS

Cross-Platform Development
Flutter

Streaming & Communication
Live Streaming, Video & Audio Calling
(ZEGOCLOUD, Agora.io ✎)

Architecture & Code Quality
MVC Architecture, Clean Code, Reusable
Components

App Deployment
Google Play Store & Apple App Store Configuration

Platform-Specific Features
Camera, GPS, Maps Integration etc

Backend & Cloud Services
Firebase (Authentication, Firestore, Realtime
Database, Cloud Functions)

UI/UX Design
Responsive UI, Animation & Motion Design

Local Database
SQLite, Shared Preferences

API Integration
REST APIs, GraphQL APIs

Version Control
Git & GitHub (Branching, Pull Requests,
Collaboration)

Notifications
Push Notifications (Firebase, OneSignal)

Payment Systems
Stripe Integration

Third-Party SDKs
Integration & Customization

EDUCATION

Software Engineering   2019 – 2023
Comsats University Islamabad   Abbottabad, Pakistan

FSC (Pre-engineering)   2016 – 2018
